ANETS
FOOD PREPARATION SYSTEMS

DE-100

DOUGH EXTRUDER

*eliminates
costly scaling!*

Anets versatile Dough Extruder eliminates costly scaling and handling. . .dough flows directly from extruder to infeed belt of sheeter. This compact unit provides a uniform, continuous flow of dough. Coupled with Anets accessories, it creates a food processing system that eliminates slow and costly hand operations as well as costly waste. You can add versatility to your food processing system, check with your Anets representative for information on the latest applications.

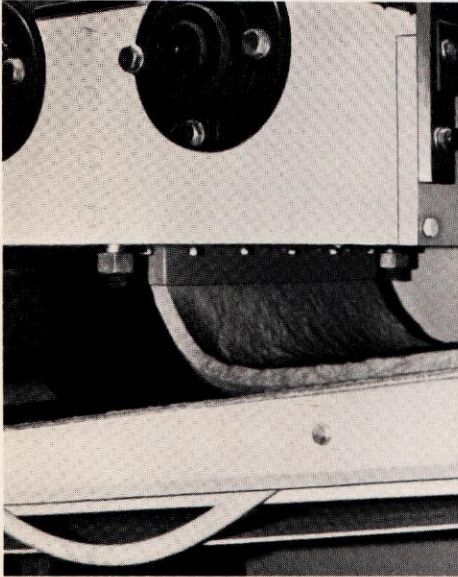

Illustrated above is a typical Danish Roll-in System consisting of a DE-100 extruder, sheeter conveyor table with variable rate cut-off device, roll-in pump with manifold, and booking area.

ANETS DE-100 DOUGH EXTRUDER

FOOD PREPARATION SYSTEMS

CONSTRUCTION FEATURES AND SPECIFICATIONS

Motor - 1 HP Variable speed Drive with 10-1 ratio enables precise control of dough flowage. . .adds uniformity.

Extruding Rolls - all stainless steel 10 inch diameter extruding rolls have special profile, individually cut teeth.

Hopper - stainless steel hopper removes easily. Maintains a uniform head of dough giving maximum uniformity of dough sheet.

Pressure Plates - T-bar pressure plates are easily removed and provide positive leak-proof operation.

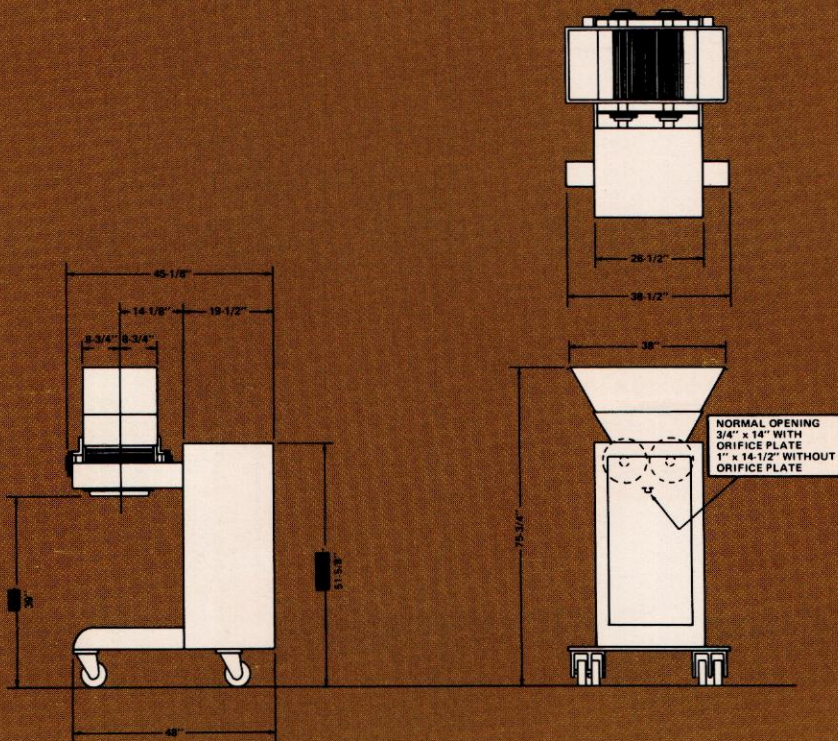

Bearings - sealed Pilot Mount Flange Bearings provide years of trouble free service.

Scrapers - exclusive teflon-coated scrapers have low profile Tapper that eliminates dough churning at the discharge orifice.

Casters - heavy duty sanitary casters with brake add portability... versatility.

backed by more than 50 years of specialized experience
