DOUGH ROLLER

*a versatile unit
for pie, pizza,
specialty doughs...*

The Anets portable Dough-Roller provides the fast, sure, consistent way to produce crisp, flaky crusts or doughs. Even untrained operators can produce pie, pizza, danish, and sweet doughs with uniform thickness . . . at five to six times faster than hand rolling. Metered adjustment permits rapid changes for desired thicknesses. The portable Dough-Roller can be moved easily to any section or area.

Available as independent unit . . . Model MDR-4C Complete with sturdy, welded steel stand, four casters . . . MDR-4S.

PORTABLE DOUGH ROLLERS

MDR-4C MDR-4S

MDR-4C Construction: Heavy cast iron frame. All machined parts of cast iron or steel.

MDR-4S Construction: Welded 14-gauge steel with baked white enamel finish.

Rollers: Cylindrically ground for a precision finish to assure uniform sheeting. Size: 18 inches long by 3½ inches in diameter. Adjustable from 0" to 1". Numerical scale adjustment for repeat setting.

Scrapers: Steel scrapers are ground for perfect alignment with rollers.

Dough feed plate: Hot rolled steel . . . assures easy sliding of dough pieces.

Flour tray: Conveniently located at top of unit.

Motor: ¼ H.P., 110 volt AC, single phase. 6-foot cord and safety plug.

Safety Switch: Flour tray is attached to mercury safety switch. If operator's hands get too near roller, power is shut off.

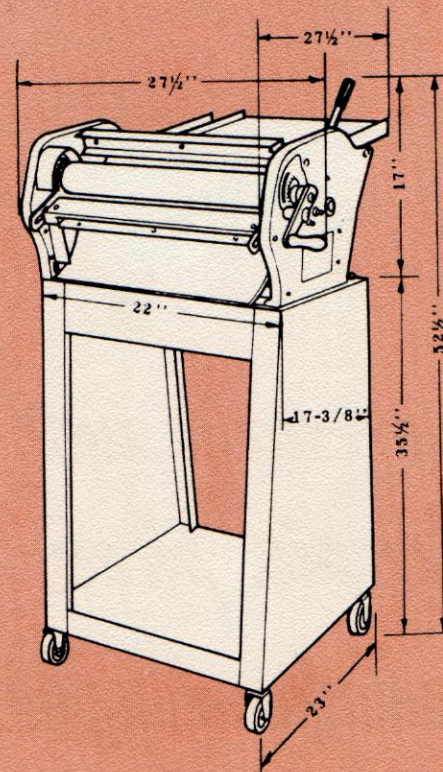

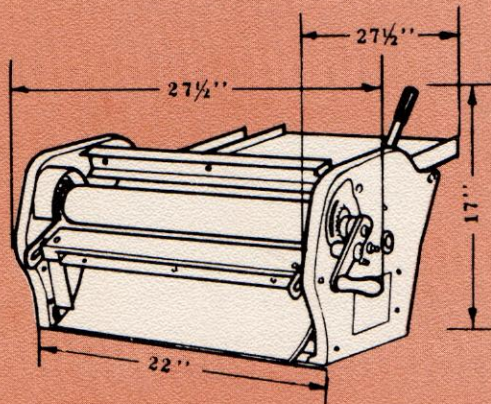

Speed reducer: Chain-drive speed reducer drives rollers at 52 feet per minute.

Shipping weight (approx.):

MDR-4C 287 lbs. MDR-4S 355 lbs.

Owing to our policy of continuous product improvement, specifications are subject to change without notice.
