Model R 6CN 9DL Illustrated

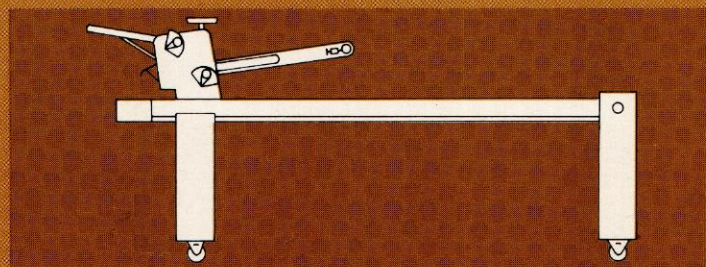

**VARIABLE SPEED PRODUCTION TABLE • SERIES R**

*compact...versatile...low-cost...designed  
for greater output in limited spaces*

Anets variable speed Production Table coupled with Anets Accessories adds the many advantages of automated production...at a new low cost. This newly-designed unit is compact and operates effectively, efficiently in limited space. This versatile performer with accessories answers a full variety of production requirements—sheeting basic sweet dough, danish, puff pastry and pizza as well as cutting for donuts, bismarcks, long johns, turnovers and other specialties. Appearance and quality is improved through greater uniformity and more precise control in sizes, shapes and weights. Slow and costly hand operations are eliminated as well as costly waste. You can customize your Anets Table to your production needs with Anets Automated Accessories. Variable Speed Table is available in 5, 9, 13, and 17-foot lengths with full 24-inch conveyor belt. Table can be used independently for packaging, decorating or extension of infeeds on sheeters.

Anets Dough Sheeters can be rolled into position with Production Table for fast, uniform production of doughs for pies, pizzas and sweet goods. Units are adjustable for various thicknesses...metered for repeat settings.

Model 6CBN (illustrated) with power driven infeed belt for ease of operation.

### Adjustable Speed Range

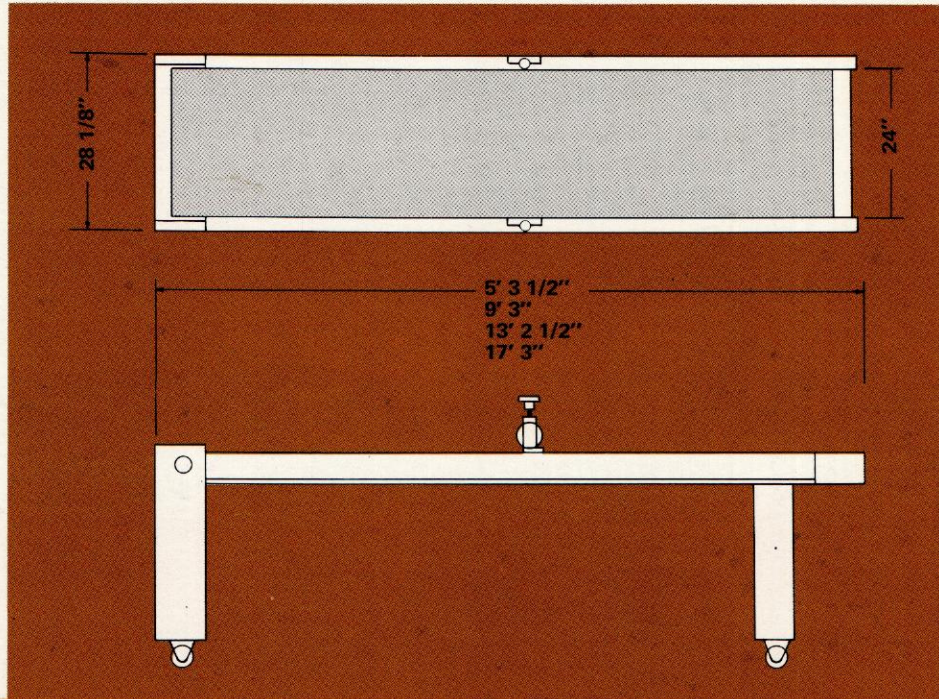

Conveyor speed can be adjusted from five (5) to thirty (30) feet per minute...to adjust to type of production and output desired. Other speed ranges available at extra cost.

### 24-inch Conveyor Belt

Unit is compact but provides the advantages and output of larger, more costly systems. Neoprene impregnated belt is a full twenty-four inches wide.

### Table Is Caster-Mounted

Production Table is mounted on four 3-inch, heavy-duty casters. Optional gliders at no extra cost.

## FEATURES / SPECIFICATIONS

### PRODUCTION TABLES

**CONSTRUCTION**—precision machined parts and heavy formed, sanitary constructed frame. Finished in non-toxic white epoxy.

**CONVEYOR BELT**—24-inch wide conveyor belt, neoprene impregnated for sanitation. Vulcanized endless.

**SPEED RANGE**—5 to 30 feet-per-minute. Other ranges optional at extra cost.

**ROTARY CUTTER HOLDERS**—one pair standard.

**TABLE LENGTH**—available in 5, 9, 13, and 17 foot lengths.

**ELECTRICAL**—110/230 V, 1 ph, 60Hz.

**SHIPPING WEIGHTS**—upon request.

### SHEETERS

**MODELS 6CN 6SN** See Bulletin No. 512

**8CN 8SN** See Bulletin No. 513

**SHEETER SPEEDS ADAPTABLE TO CONVEYOR OPERATION**

**MODELS 6CV 6SV** Construction specs same as above except with variable sheeter speed drive.

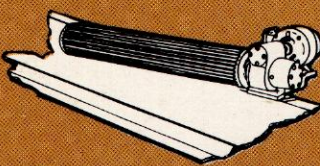

**8CV 8SV**

**MODELS 6CBN & 6SBN** Same as 6CN & 6SN above with exception of added infeed belt in place of slide.

**6CBV - 6SBV** Same as above w/variable sheeter speed.

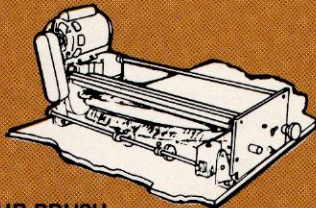

**NOTE:** WHEN ORDERING DL CONVEYOR UNITS FOR USE WITH EXISTING SHEETERS, MODIFICATION KITS ARE AVAILABLE TO ADAPT SHEETER SPEED TO EFFICIENT CONVEYOR OPERATION.

Most Anets Automated Accessories can be utilized with the Variable Speed Production Table to provide additional sweet goods production.

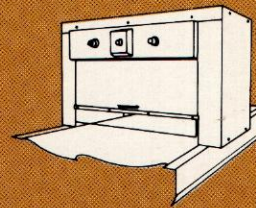

### ROLL WINDER

For coiling cinnamon rolls, butter-fly rolls, honeybuns, etc. Available for right or left hand operation—or both.

### FLOUR BRUSH

Flour is aerated and excess is removed and deposited in container for re-use. Adjustable to dough thickness. Automatic start/stop switch.

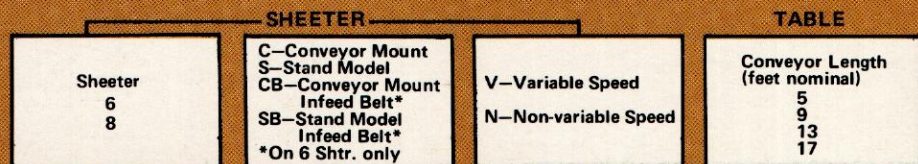

### GUILLOTINE BLADE VARIABLE CUTTER

Model DC-10 provides stroke ranges of 15 to 135 continuous cuts per minute, 1 to 20 intermittent cuts per minute.

### SIMPLIFIED ORDERING GUIDE— SERIES R TABLE & SHEETER

The first three "boxes" are to indicate the Anets Sheeter Model desired, conveyor or stand mount, infeed belt on No. 6 Sheeter only, and variable or non-variable sheeter speed, the final box is to indicate the table length desired.
