

MODEL 460 SPECIFICATIONS

• EQUIPMENT

Dimensions:  
Width: 4.13" (10.5cm)  
Length: 22" (56cm)  
Height: 19.5" (49.5cm)

Weight:  
29 lbs (13.15kg)

Labeling Speed:  
600+ pieces per minute

Electric:  
115VAC/60Hz/1.5 AMPS (max.)  
230VAC/50Hz/1.5 AMPS (max.)

• LABELS

1/2"w x 1/2"L (min.)  
15/16"w x 2"L (max.)  
14" Label Roll O.D.  
2" or 3" Core I.D.

MODEL 420 SPECIFICATIONS

• EQUIPMENT

Dimensions:  
Width: 4.5" (11.5cm)  
Length: 22" (56cm)  
Height: 19.5" (49.5cm)

Weight:  
16 lbs (7.26kg)

Labeling Speed:  
Up to 300 pieces per minute

Electric:  
115VAC/60Hz/1.5 AMPS (max.)  
230VAC/50Hz/1.5 AMPS (max.)

Air:

25-60 PSI at 1CFM Dry, filtered air

• LABELS

1/2"w x 1/2"L (min.)  
15/16"w x 2"L (max.)  
14" Label Roll O.D.  
2" or 3" Core I.D.

- The most cost effective way to apply labels to individual pieces of produce.
- Labelers are self contained and operate independently of one another.
- Interfaces with Automatic sizer/sorters for selective labeling.
- Uses solid state digital electronics for reliability and long life.
- No minimum label purchase or label contract required.
- Rapid labeling speeds with reliable drive systems.

## HIGH SPEED PRODUCE LABELING

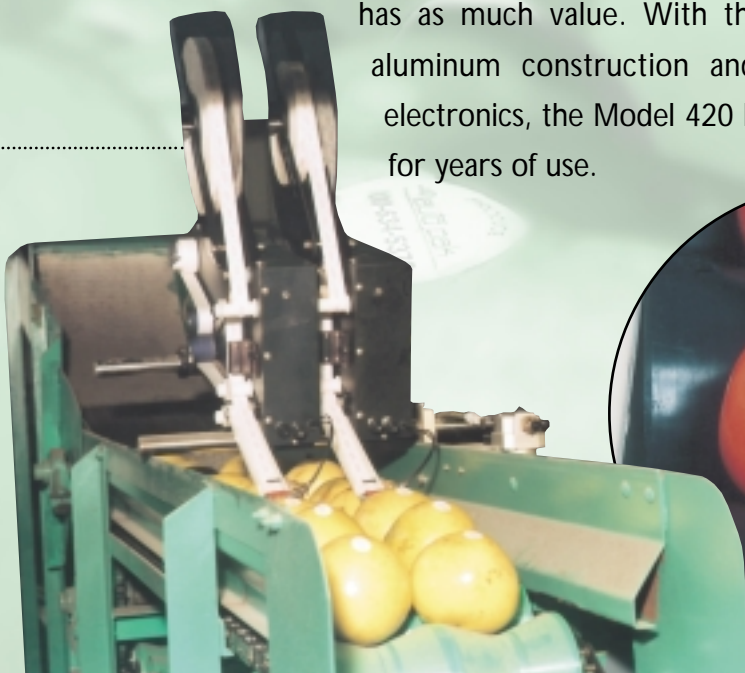

MODEL 460

MODEL 420

## LOW-COST PRODUCE LABELING

The Model 420 is a rugged low-cost produce labeling system that works with almost any singulation conveyor. For moderate speed labeling, up to 300 pieces per minute, no other labeling system has as much value. With thick anodized aluminum construction and solid state electronics, the Model 420 labeler is built for years of use.

DIVISION OF BOOTH MANUFACTURING COMPANY

### COMPANY INFORMATION

Auto Pak, a division of Booth Manufacturing Co., specializes in automated systems for produce labeling. Packing operations across North and South America use Auto Pak labeling systems to save time and money. Auto Pak's manufacturing, service, sales and engineering facilities are located in Fort Pierce, Florida conveniently located to serve the Florida citrus industry.

### AUTOMATIC LABELING

Labeled produce can provide brand name recognition, place of origin and PLU price coding. There is now a greater demand than ever for labeled produce and the demand is growing rapidly. Auto Pak can provide a way to label produce without draining your budget. Auto Pak's produce labeling systems are the most cost effective way to apply labels to individual pieces of produce. With their unique "motion controlled" arms and gentle label wipe downs, the Model 460 and Model 420 labelers accurately, consistently and gently apply labels to most shapes, sizes and textures of produce.

### MORE FREEDOM FOR YOU

Do you want to lease, finance or purchase your labeling equipment? Do you want paper labels or plastic? Auto Pak gives you the freedom to choose the method of finance and where you buy labels. This means you don't have to sign lengthy lease agreements or label contracts, allowing you to potentially save tens of thousands of dollars each year. Also by negotiating for shorter lead times on labels, less stock is needed at the packinghouse.

### WE ARE THE EQUIPMENT SPECIALISTS

By staying out of the lease and label business, we can concentrate on one thing, the equipment. This means Auto Pak's labeling systems are among the best engineered and built labelers that you can buy. That pays off in longer equipment life, less downtime and lower repair costs.

### CUSTOM APPLICATIONS ARE NOT A PROBLEM

Is your produce sized, not sized, on an optic sorter, on a grommet roller, moving fast or irregular shaped? Auto Pak labeling systems have been installed and tested in a wide variety of applications. Our labelers and mounting hardware are all adaptable, making installation and integration to your packing line easier. In the unlikely event that you should need features that our standard systems do not provide, being the manufacturer means that we can professionally customize equipment to meet your special requirements.
