The Autobag® H-100 maximizes uptime and reduces your packaging costs.

Using genuine Autobag plastic bags-on-a-roll, the all-purpose Autobag H-100 bagging system automatically dispenses, opens and heat-seals up to 45 packages per minute. And the system requires only one operator.

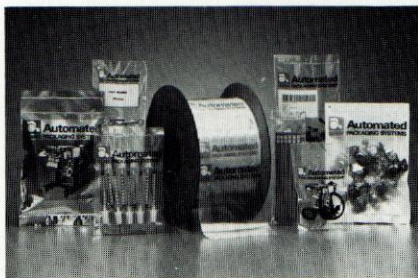

Applications

A completely modular packaging system, the H-100 easily ties into counting, weighing and conveying equipment. Ideal for such industries as:

- Hardware / Fasteners
- Automotive
- Food
- Retail
- Electrical / Electronics
- Medical

Features

- System is simple to operate and maintain.
- Small & compact; requires minimal floor space.
- Uses genuine Autobag® plastic bags-on-a-roll. Bags come in a variety of styles. Sizes up to 10½" x 22" in thicknesses from .0015" to .004" — plain or pre-printed in up to six colors.
- Fast and easy bag changeover.

Immediate delivery available on standard plain stock sizes.

Options

The H-100 plastic packaging system can accommodate a variety of optional equipment:

**Packaging - Processing
 Bid on Equipment**

1-847-683-7720

www.bid-on-equipment.com

Optional AutoLabel™ PI-4000 programmable imprinter.

- Imprinters — for in-line imprinting of variable data, codes, part numbers, etc.
- Cycle counters — for recording bin/inventory quantities. Ideal for MRP control.
- Caster assembly — provides complete mobility throughout the plant.

Plus a variety of other optional equipment to help make the job of packaging simple, easy and efficient.

Operation

The H-100 packaging system automatically indexes and air-opens bag for automatic or manual loading of parts/product. Footswitch or auxiliary equipment triggers bagger to automatically heat-seal, detach and release finished package. Bagger repeats cycle by automatically indexing next bag forward for parts/product loading.

Specifications

Weight	220 lbs.
Width	24"
Depth	30"
Height	30" to 41½" (adjustable)
Maximum pass-through area	4"
Electrical	117 VAC
Air	80 PSI

Automated Packaging Systems is a leader in the flexible packaging industry worldwide, with manufacturing and distribution facilities in the U.S. and Europe. The company also distributes its product lines in Canada and Mexico.

By skillfully combining engineering expertise with its machinery, materials and service, Automated Packaging, a producer of packaging systems technology for more than 25 years, provides a "total system" solution to packaging problems. All machinery and materials are engineered and manufactured together to deliver maximum uptime and an average six- to twelve-month return on investment.

To help customers keep pace with rapid changes in packaging, Automated Packaging offers custom printed or plain stock bags-on-a-roll; manual, semi-automatic and fully automated packaging machinery; and comprehensive engineering, technical field service, customer training and graphic design services.

From the versatile Autobag® bagger, to the Sidepouch™ bagger for retail display packaging and the FAS™ 1000-S for food, Automated Packaging provides efficient, high-performance packaging materials and systems to enhance product protection, appearance and marketability.

For a FREE evaluation of your equipment needs or more information on the H-100 system, write to us or call toll free 1-800-331-4414.
