## The P-100™ Hot Stamp Imprinter — the low cost in-line solution to plastic package product identification

The AutoLabel™ P-100 is an in-line hot stamp imprinter designed to work with your Autobag bagging system.

The P-100 is the inexpensive solution to printing product identification including stock numbers, codes, part numbers and simple diagrams directly on an Autobag plastic bag.

The P-100 is ideal for applications where large volumes of a single product are packaged.\* It cycles automatically with your Autobag bagger, so it won't slow down your packaging process.

### Ribbon

The P-100 uses mylar ribbon instead of inks or chemicals, so it prints remarkably clear images

with no smudging and no drying time. The ribbons are available in nine different colors (black, red, blue, white, pale blue, yellow, orange, green, and brown). Ribbon for the P-100 is available in 1-1/2" to 4" widths in increments of 1/2" (i.e. 2", 2-1/2", 3", etc.)

### Easy-To-Use Snap-In Chase

Changing from one hot stamp plate to another is easy with the P-100's handled snap-in chase. The chase simply snaps in so data changeover is quick and easy. Grooved or magnetic chases are available and have a maximum imprint area 1- 3/4" high by 3-1/2" wide.

The grooved chase is used with bar type (lines of pre-set type)

tube type (individual letters), etchings or a combination and has an 8-line limit for bar and tube type. The quick change magnetic chase uses Addressograph® plates available from outside suppliers.

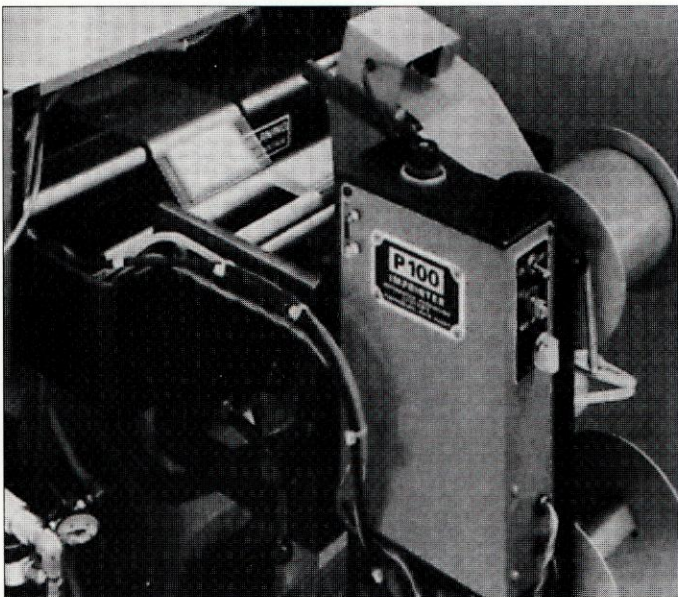

The AutoLabel P-100 Hot Stamp Imprinter - the economical, easy-to-use imprinter for on-bag product identification.

### Specifications

- Width** 19" (48 cm)
- Length:** 23 1/2" (60 cm)
- Height** 22" (56 cm)
- Weight** 75 lbs. (34 kg.)
- Air:** 80 P.S.I.
- Electrical** 115 VAC

\* If your printing needs involve frequent data changeovers or printing of high resolution graphics and bar codes, be sure to inquire about the the AutoLabel PI-4000 in-line, programmable, thermal transfer imprinter from Automated Packaging Systems, Inc.
