

# Shrink Sleeve Labeler - EZ-300

## Overview

The Axon EZ-300 series is a part of our EZ-line of heat shrink sleeve label and tamper evident bands applicators. It is designed to handle product container widths from 2-3/8" to 7-3/8" and sleeve layflats up to 300 mm.

We offer the EZ-300 in a variety of multiple head configurations to suit your needs. The single head design can run up to 70 containers per minute and is an excellent entry-level machine. Our dual head design (EZ-2-300) can run up to 130 containers per minute. For your most demanding lines, our three head design (EZ-3-300) can run up to 180 containers per minute. All speeds are dependent on the width and length of the sleeve.

These fully automatic, continuous motion shrink sleeve labeling machines utilize minimal moving parts for high reliability and low maintenance. As with all Axon label application machinery, the EZ-300 series can be easily integrated with existing lines or Axon can provide a complete system including tamper evident band applicator, conveyor, and heat shrink tunnel.
