

Convective Heat Shrink Tunnel - EZ-48-SRB

Overview

The EZ-48-SRB is a dual zone, convective heat shrink tunnel that processes tamper evident bands and sleeve/label applications.

Our EZ-Seal convection heat shrink tunnels, radiant heat shrink tunnels and steam heat shrink tunnels set the standard for performance and value. They are configured in a range of sizes to provide optimum shrink performance in minimum space.

Features:

- Wide range of standard sizes
- Optional automatic lift
- Stainless steel construction
- State-of-the-Art temperature controller

Product Attributes

Application	Sleeves / Bands
Max Bottles	5" x 7"
Type	Recirculating/Dual Zone

Industry Types Served

- Beverage
- Dairy
- Chemical/Industrial
- Consumer Products
- Food
- Produce
- Health & Beauty Aids
- Household Goods
- Nutraceuticals
- Pharmaceutical
