

# Combi

Packaging Systems LLC

## DROP PACKING

*DP Loader System*

◆ **DP and DPI** Extensive years of design and innovation ensure years of trouble-free operation. Four points of contact on the case lift and our exclusive soft drop technology support and cushion cases on the up and down stroke. Offered with or without integrated case erector.

## HORIZONTAL LOADING

*CHL Horizontal Loader*

◆ **HL and CHL** Efficiently pack round or cylindrical products, as well as cartons on the most versatile case loading system in our line. Various product collation and orientation options available. Equipped with or without integrated case erector.

30 Years of Providing

# Case Packing Solutions

**PICK AND PLACE**

*Alphapack Pick and Place System*

◆ **alphapack™** This system features an integrated case erector, yielding the smallest footprint in the industry. This versatile multi-axis servo pick and place unit provides precise top loading of cartons, cans, bottles, bags and other products in single or multiple layers.

◆ **SPP** For faster picks per minute, integrate this machine with your existing or a new Combi high speed case erector. Available with 1 to 4 picking heads for an impressive variety of products. Gentle product handling and precision vacuum pick up assure consistent case loading and product integrity at speeds up to 30 picks per minute (product dependent).

*Expresspack Hand Packing Station*

## HAND PACKING STATIONS

*Ergopack Hand Packing Station*

◆ **ERGOPACK® and EXPRESSPACK** are unique in the industry and the perfect solution for never touching another case. Avoid the physical stresses associated with manual packing including lifting, reaching, bending, twisting, and gripping.

Ideal for food packing applications requiring inspection before packing; packing products of various sizes where total automation is not practical; or applications where you need more than a stand-alone case erector, but you can't justify total automation.

Pick It.

Place It.

Drop It.

Load It.

We do it All.

## CASE ERECTORS

# Instant Labor Savings Increased Productivity

◆ **2-EZ®XL and 2-EZ®XXL** These side belt units easily handle larger cases and styles including double wall and triple wall corrugated cases. For consistently square cases up to 26" wide. 8-10 cpm

◆ **CE-10** For medium duty applications. Standard low tape/no tape and low case/no case alarms and light; case counter and powered case magazine. Can be integrated with 3M-Matic 120af sealer for our Expresspack hand packing station. 10 cpm

◆ **2-EZ®** Engineered for longevity, this machine features vertical case orientation, positive vacuum opening, and patented positive pusher bar case feed which provides one of the most dependable methods of making a consistently square case. 12 cpm

◆ **2-EZ®HS and 2-EZ®SB** These side belt units are a response to our customers' needs for faster speeds. Available with servo drive, these machines are built with the same durability and reliability of the 2-EZ family of case erectors. 15-20 cpm

◆ **VCE** The VCE was designed to consume less air than comparable case erectors. It's opposing vacuum system provides a more reliable forming process with corrugated inconsistencies. This environmentally friendly machine is ideal when floorspace is at a premium.
