FEATURES OF THE ENDPACKER

CASE STYLE

The ENDPACKER can be designed to use RSC or FOL side or end opening flaps.

SYSTEMS CAPABILITIES

Each ENDPACKER is tailored to meet users application.

Semi-automatic--Erects case, positions case for manual loading, seals all flaps. Speed up to 10 cases per minute, dependent upon operator.

Fully Automatic--Erects case, accumulates product, loads and seals case. Speeds up to 20 cases per minute.

A variety of accumulator/load designs to handle most applications.

Quickly adjusts to a wide size range. Most by hand crank--No special tools.

Adhesive system--Hot melt, Cold glue or Pressure Sensitive Tape.

Low maintenance--Design is simple with few moving parts and easy access for fast repairs.

Durable construction for years of rugged service.

Utilities required--Pneumatic, 80 psi, electrical 220/440 VAC. Air or electrical controls (optional).
