

JSL™ Bag Top Labeler

The Semi-Automatic Bag Top Labeler.

The Dobby JSL™ Bag Top Labeler seals, folds and labels up to 40 bags a minute. Its touch-plate control makes it easy to operate. And it's from Dobby, so you know it's reliable.

Broad Size Range.

Label widths and folds are readily adjustable to fit a wide variety of packaging needs.

Professional Seal.

Free floating, non-warp sealing jaws maintain a uniform package seal.

Accurate Label Placement.

Vacuum separation and gravity slide assure positive placing of labels on top of package.

Positive Seal.

Speed, pressure and temperature can be varied to create a perfect seal on many films.

Broad Package Range.

Pre-made, pre-filled bags of cellophane, coated cellophane, polyethylene, saran and other heat sealable materials can be used.

Dobby

JSL™

Easy, Reliable Operation.

The Dobby JSL™ Labeler is an easy-to-use and reliable mechanical bag top labeler. With speeds of up to 40 bags a minute, it's perfect for all short-run packaging applications.

Temperature Controls.

Assure accurate sealing temperature for many films at any setting.

Convenient Touch-Plate.

Activates the machine to seal and label the bag top after the operator positions the bag.

Adjustable Settings.

Floating blade and label hopper adjusts for a variety of label sizes.

Sturdy Construction.

Made from rugged steel and designed with an adjustable two post floor stand for easy operation, access and maintenance.

Customized Options.

Variety of hole punch options are ideal for custom display-rack mounting.
