

The Domino M-Series *plus*

Setting the standard for print and apply

The M-Series **plus** range of print and apply labellers offers a fully modular solution to meet the many and varying needs of manufacturers today. Delivering accurate information and label placement without compromising production line speeds ensures maximum productivity, flexibility and therefore profitability.

A supplier you can rely on:

- Supported by a global sales and service network, the M-Series **plus** range delivers sustainable print and apply solutions for case and pallet applications
- Built for continuous operation, the M-Series **plus** integrates easily into existing production lines

High resolution printing of bar codes, text and graphics ensure supply chain compliance

The M-Series **plus** range offers complete label application flexibility

A manufacturer supplying manufacturers:

Domino's commitment is to continually evolve by listening to manufacturers and supply the tools that will enhance their business.

- M-Series **plus** features directly impact the measured performance of the production environment
- The modular approach of the M-Series **plus** range ensures solutions are tailored to customers' specific needs
- The M-Series **plus** range was designed with an open approach, enabling database communication and fully networked systems

Benefits

- **Enhanced throughput** – seamless integration into production lines ensures line efficiency is maintained, labels can be applied to both moving and stationary products
- **Reduced errors** – the simple label selection for the M-Series **plus** ensures operator independence
- **Maximum availability** – the simple and robust M-Series **plus** ensures line efficiency
- **GS1 compliant codes** – high resolution printing of bar codes, text and graphics ensure supply chain compliance
- **Fast changeover** – simple ribbon and label paths ensure fast consumable changes

The modular approach ensures that the individual application requirement is not compromised

M200 printer with optional low label level sensor

- **Optional sensors** alert operators when consumable levels are low
- **Flexibility** – M-Series **plus** can apply a label with Blow, Tamp, Tamp-Blow or Wipe label application options, left and right hand variants to provide an optimal solution. In addition, the unique design of tamp applicator pads enables a wide range of different labels to be applied using the same applicator pad
- **Connectivity** – The M-Series **plus** features both USB and RS232 connections as standard with optional Ethernet

Applicators

The range of standard Blow, Tamp, Tamp and Blow and Wipe applicators are combined with the comprehensive range of printers to create optimal solutions.

The M-Series *plus* Range

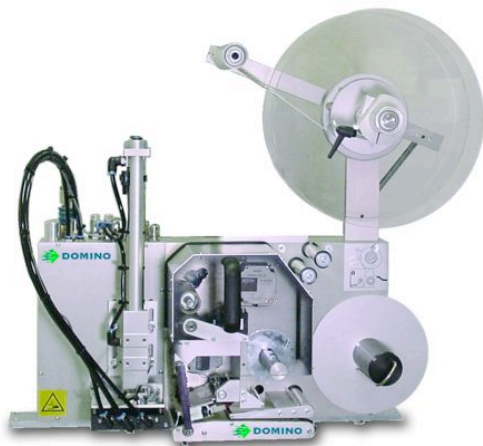

The M-Series **plus** is a modular system consisting of the most popular combinations. These standard configurations offer a solution for a vast range of print and apply requirements. The modular approach ensures that the individual application requirement is not compromised.

Printers

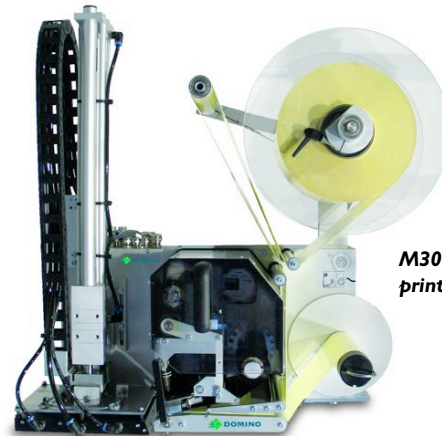

The M-Series **plus** offers a range of products providing thermal transfer, direct thermal in both left and right hand versions as well as the ability to integrate OEM print engines.

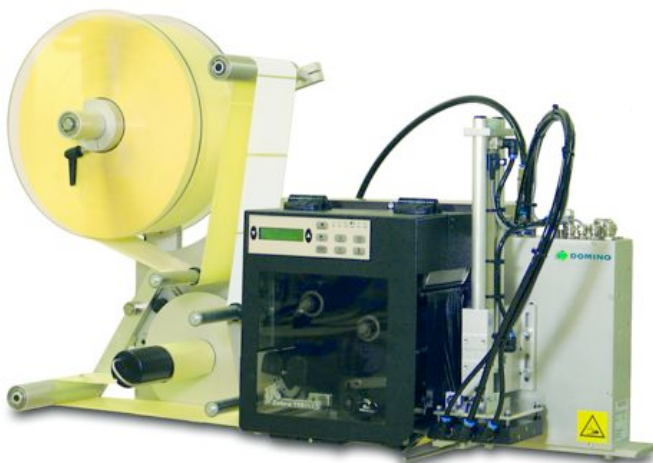

M100 Direct Thermal with blow applicator

M200 Thermal Transfer with tamp blow applicator

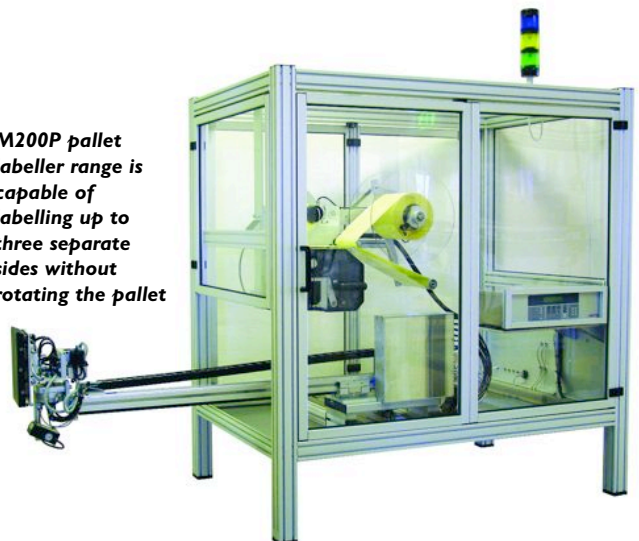

M300 RFID capable print & apply system

M400 OEM Print Engine with tamp blow applicator

M200P pallet labeller range is capable of labelling up to three separate sides without rotating the pallet

Printer Control Unit

The high performance printer control unit has been designed to be intuitive with an informative operator interface.

Printer Control Unit (PCU)

Accessories

The M-Series **plus** range is complemented by a range of accessories such as handheld terminals, fully adjustable stands, beacons and bar code validation scanners.

TG300 Hand Controller for label solution and user prompts providing operator editable fields

Software

M-Design

- Windows based label creation and design
- Ability to download to printer via serial, USB or Ethernet connections

M-Setup

- Windows based printer configuration and control
- Save settings for backup or setup other printers via serial, USB or Ethernet connections

Windows Driver

The Windows driver allows the continued use of any software that supports windows printer drivers:

- Facilitate change
- Reduce retraining overhead
- Re-use of existing label creation software

Control Scanner
