

Radial Spinner System

An efficient, cost-effective way to apply production fluids inside cylindrical parts.

Anaerobics
Cyanoacrylates
Lubricants
Silicone Gels
Solvents

EFD[®]
A NORDSON COMPANY

EFD's Radial Spinner System makes it easy to apply neat, consistent bands of low-to medium-viscosity fluids inside cylindrical parts between 0.4" and 5" in diameter.

Compact size and precise control make the Radial Spinner System ideal for processes where fluid must be applied inside small cylinders or confined to specific locations and kept off surrounding areas. Inert wetted parts make the system ideal for use with reactive fluids like cyanoacrylates and anaerobic adhesives.

The Radial Spinner System includes a precision dispense valve, air motor, bracket, valve/motor controller, disc assembly and dispense tip. Disks and tips are available in different sizes to meet a wide variety of applications.

During operation, the valve dispenses a controlled amount of fluid onto the spinning tapered disk. As the fluid leaves the edge of the disk, it is distributed as a narrow, even band on the wall of the part.

Benefits

- Applies correct amount on every part
- Applies material in correct location
- Keeps material off unwanted areas
- Eliminates waste, mess and rework
- Improves product performance and appearance
- Low-maintenance design reduces downtime
- Operates in vertical or horizontal position

Filter / Regulator / Lubricator / assembly provides a lubricated air supply to the 7860C-RS Radial Spinner air motor to ensure long and reliable motor life and performance.

Radial Spinner/Disc

7880-9MM (.354")

7880-12MM (.473")

7880-15MM (.590")

7880-19MM (.745")

752V-UHSS Dispense Valve

Precision diaphragm valve has inert, non-reactive wetted parts. Low-maintenance design has no seals or O-rings to wear out or leak, and is rated for 100,000,000 cycles.

Dispensing Tips

Precision tips feature EFD SafetyLok hubs for secure attachment and polished 1-1/2" stainless steel needles for unobstructed fluid flow.

7885-B 18 gauge needle – 30 degree bend 20/box

7886-B 21 gauge needle – 30 degree bend 20/box

7887-B 23 gauge needle – 30 degree bend 20/box

7060RA Radial System Controller

Controls operation of the air motor and dispense valve.
