Halpak Stainless Steel Heat Shrink Tunnels and Conveyors Save Time and Lower Operating Costs.

While the PVC DRI-SEAL® material may be applied by hand and manually heated, Halpak's low cost heat shrink tunnels and conveyors save many man-hours and assure uniform encapsulation. Some are also capable of operating in conjunction with automatic banding equipment.

Models HT3479 and CB72DC

See other side for details.

Model 2234 Cap Sealer Tunnel/ Neck Banding

Especially designed for neckbanding and small containers—up to 2½" diameter. Including pharmaceuticals and vitamins. Mounts over most standard size moving belts. Can be adjusted for taller bottles or containers. 6000 Watts. 220 Volts single phase.

Model CB72DC Conveyor

Adjustable from 0 to 100 FPM. Measures 6" Wide x 72" Long. Operates on 120 Volts.

**Model 1843
 Stainless Steel Tunnel**

These exclusive features make the Model 1843 one of the most versatile and popular heat tunnels available . . .

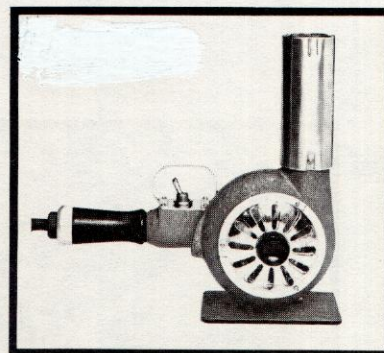

Angled Air Exit Grooves. As the container moves through the Model 1843 Tunnel, the angled

air exit grooves start to shrink the band at the bottom of the container first. Prevents band from flying off bottle!

Height fully adjustable . . . simple to raise or lower. Ideal for any size bottle! Raising or lowering the unit can regulate heat if necessary.

Compact . . . length 18", width 9", Ht. 19" (with removable heat gun in position). Tunnel opening-width 4", Height adjustable from 3"-10".

Made from finest #316 stainless steel. 120 volts—60Hz—20 amps

**Model HG501—
 Heat Gun**

Designed for hand held operation. 120 Volts (14 Amps).
