HAMILTON COVERS

Sanitary-design stainless steel kettle covers

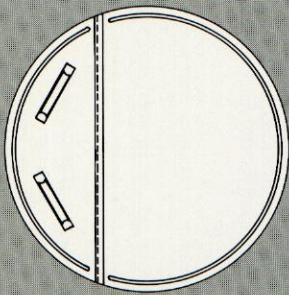

Optional equipment for all kettles and mix cookers, 15 to 500 gallons

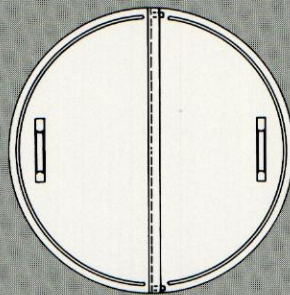

Style #1
One piece lift-off type
15 to 150 gallon size for open top kettle

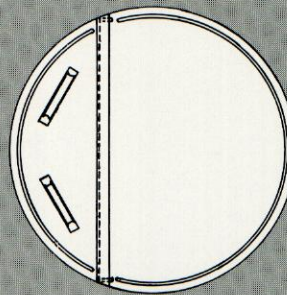

Style #2
Two piece lift-off type
15 to 500 gallon size for open top kettle

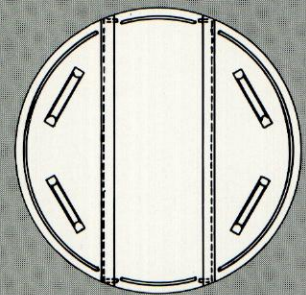

Style #2a
Two piece lift-off type
15 to 500 gallon size for open top kettle

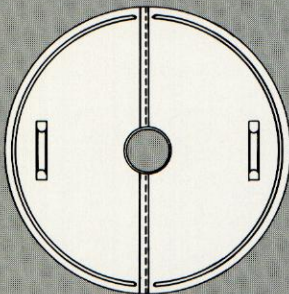

Style #3
Two piece hinged lift-off type
15 to 500 gallon size for open top kettle

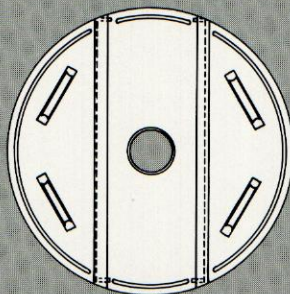

Style #3a
Two piece hinged lift-off type
15 to 500 gallon size for open top kettle

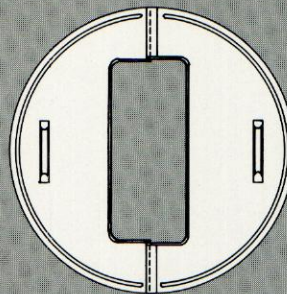

Style #4
Three piece hinged lift-off type
150 to 500 gallon size for open top kettle

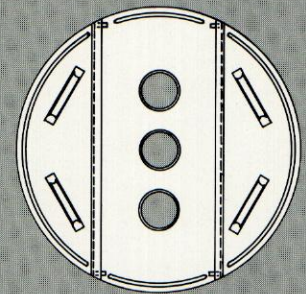

Style #5
Two piece lift-off type
30 to 500 gallon size single and double motion mix cooker

Style #6
Three piece hinged lift-off type
150 to 500 gallon size single and double motion mix cooker

Style #7
Two piece lift-off type
50 to 500 gallon size triple action mix cooker

Style #8
Three piece hinged lift-off type
150 to 500 gallon size triple action mix cooker

COVERS AND VALVES

Custom-crafted Standard Options

Covers are generally required on today's modern processing kettles for reasons of sanitation as well as personnel safety. Hamilton covers are constructed of Type #304 or Type #316 stainless steels, polished, in a completely sanitary design. All covers are provided with stainless steel handles and reinforcing beads to impart additional rigidity and strength.

Ten styles of pre-designed covers are offered to accommodate all Hamilton kettles and mix cookers. All are lift-off type. The one or two piece lift-off types (style #1, style #2, style #2a, style #5, style #7) have an overlapping end at the break line. The hinged lift-off types (style #3, style #3a, style #4, style #6, style #8) have either two or three pieces as shown. They can be opened by the hinge(s) and removed easily after being tilted to a fully-open position.

All Hamilton covers can be supplied with slots for portable agitator shafts, vent hole or inlet couplings. Vapor-tight covers, which are gasketed and securely clamped to the kettles, are an additional option. All covers can be supplied with limit switches to immediately stop rotation of agitator when cover is opened for any reason, as an optional extra safety feature. Other custom-designed covers can be manufactured to user's exact specifications. Covers for larger capacity kettles (above 500 gallons) are available on request.

The style drawings show capacity ranges and applicability to open type kettles and single motion, double motion or triple action mix cookers. Specify style number, exact material selection and capacity.

Specifications and dimensions shown are standard and correct at the time of printing. They may be modified to coincide with specific customer requirements. The company reserves the right to change or alter specifications and designs or to discontinue manufacture without notice or without incurring obligation.
