

A. The **KADY®** 2C is a fast efficient mill for all types of dispersion for medium size production plants.

B. Oil cooling reservoirs allow visual inspection of quality and condition of the oil as well as controlling the oil temperature.

C. **KADY®** designed component construction allows for fast unit servicing whether in-house or by factory.

D. Requires less than 17 square feet of your valuable space.

E. Exterior plumbing engineered to customers specific needs.

F. The **KADY®** 2C has a batch working capacity of 125 US gallons, or may be designed for semi-continuous use.

G. **KADY®** designed heavy-duty milling spindle operates in oil continuously recirculated by built-in oil pumps.

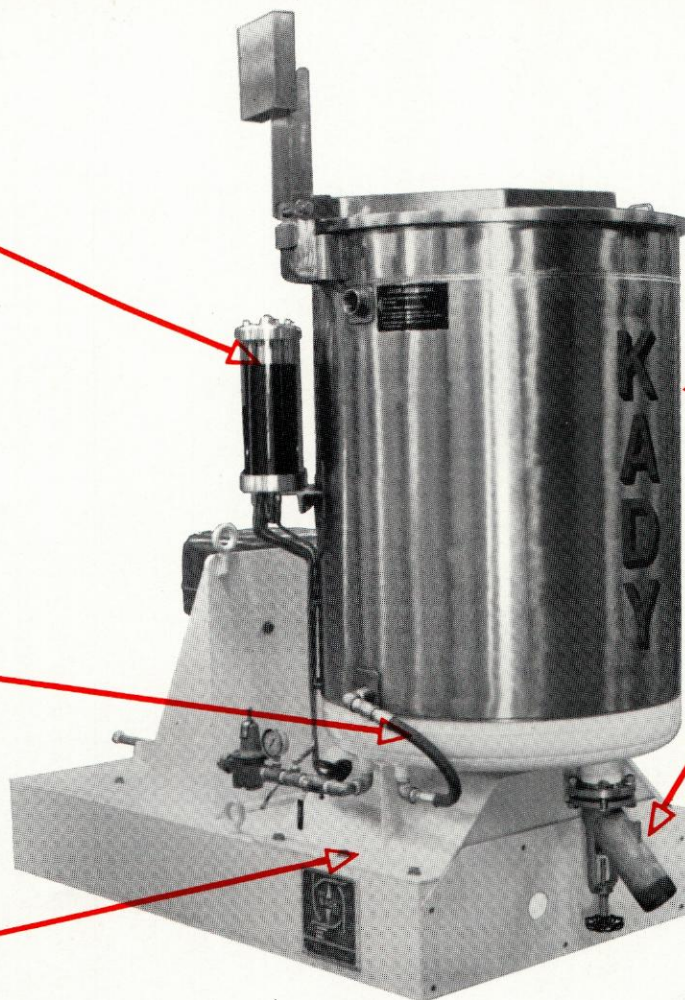

H. Famous **KADY®** milling head. All wetted parts are stainless. Optional carbide components may be used for heavy wearing materials.

I. The **KADY®** 2C is equipped with a water jacketed stainless steel tank designed to promote efficient heat transfer.

J. Custom engineering available to meet your specific needs.

K. Standard **KADY®** valve with air or manual operation.

L. Fully guarded hi-speed drive incorporates quiet running, static conducting, and oil resistant V-belts.

KADY® gives you:

EFFICIENCY

Low total horsepower per pound of finished product.
Fast vehicle changes - works equally well in water or oil system.
Fast color changes through simplicity of cleanup.

HIGH RATE OF RETURN ON INVESTMENT

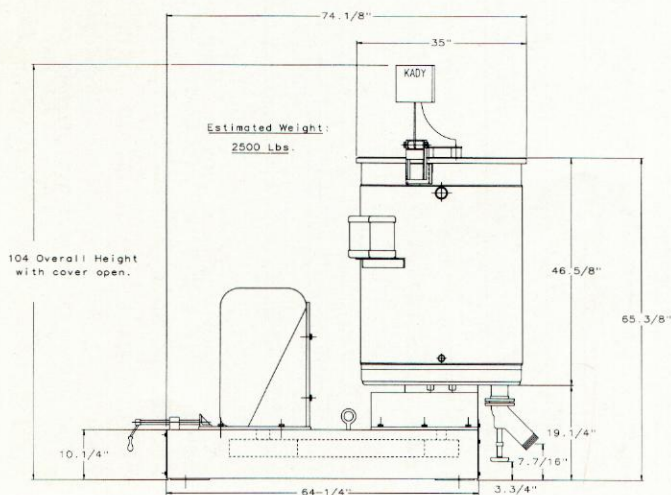

Smallest space requirement per gallon of capacity of all milling equipment - simple to install.
Greatest amount of return per operator hour cost.
Fast production, especially on special color orders, means quick cash flow.

SERVICE:

KADY® stocks all necessary replacement parts ready for overnight delivery
KADY® Service Desk is available for telephone trouble-shooting to save you time and money.
Emergency service designed to keep downtime to a minimum.
Our individual Mill files keep constant track of equipment's life in the field.

EXPERIENCE

Forty years of experience with thousands of mills worldwide assures our customers continued success with their individual needs.
KADY® MILLS are guaranteed to perform and that is a fact worth remembering when spending your next dispersion dollar.
