Capsule filler.

SUPREMA is an average-production capsule filler which reaches an output of 48,000 capsules/hour.

The modular design of this machine means that the different dosing units can be fitted alternatively, permitting filling of powders or pellets (one or two different types of pellets in the same capsule).

Can handle all capsule sizes from 000 to 5, including tamper-proof capsules.

Supplied with the full validation package, i.e.: FS / DS / IQ / OQ.

Technical data

Mechanical design:
continuous rotating movements

Total installed electrical power:
2 kW approx.

Compressed air requirements:
(specially filtered)
Minimum pressure: 6,5 bar
Flow rate: 350 dm³/minute

Standard voltage:
400 V (+/-10%) - 50 Hz - three-phase or
460 V (+/-10%) - 60 Hz - three-phase

Options:
Vacuum cleaner
Vacuum pump for capsule opening
Mod. E filled capsule sorter
Mod. TPS 2000 capsule sorter and polisher
Mod. SR/O filled capsule sorting machine

Speed

Up to: 48.000 capsules/hour

Products

powder
pellets
microtablets

Dosing

two different kinds of pellets

The present material serves by way of example only and is not binding.
Given the constant technical developments on machines, as well as customer requirements, the specifications applicable are those agreed with the purchaser.
