

1MS1G4AO Circulating Pump

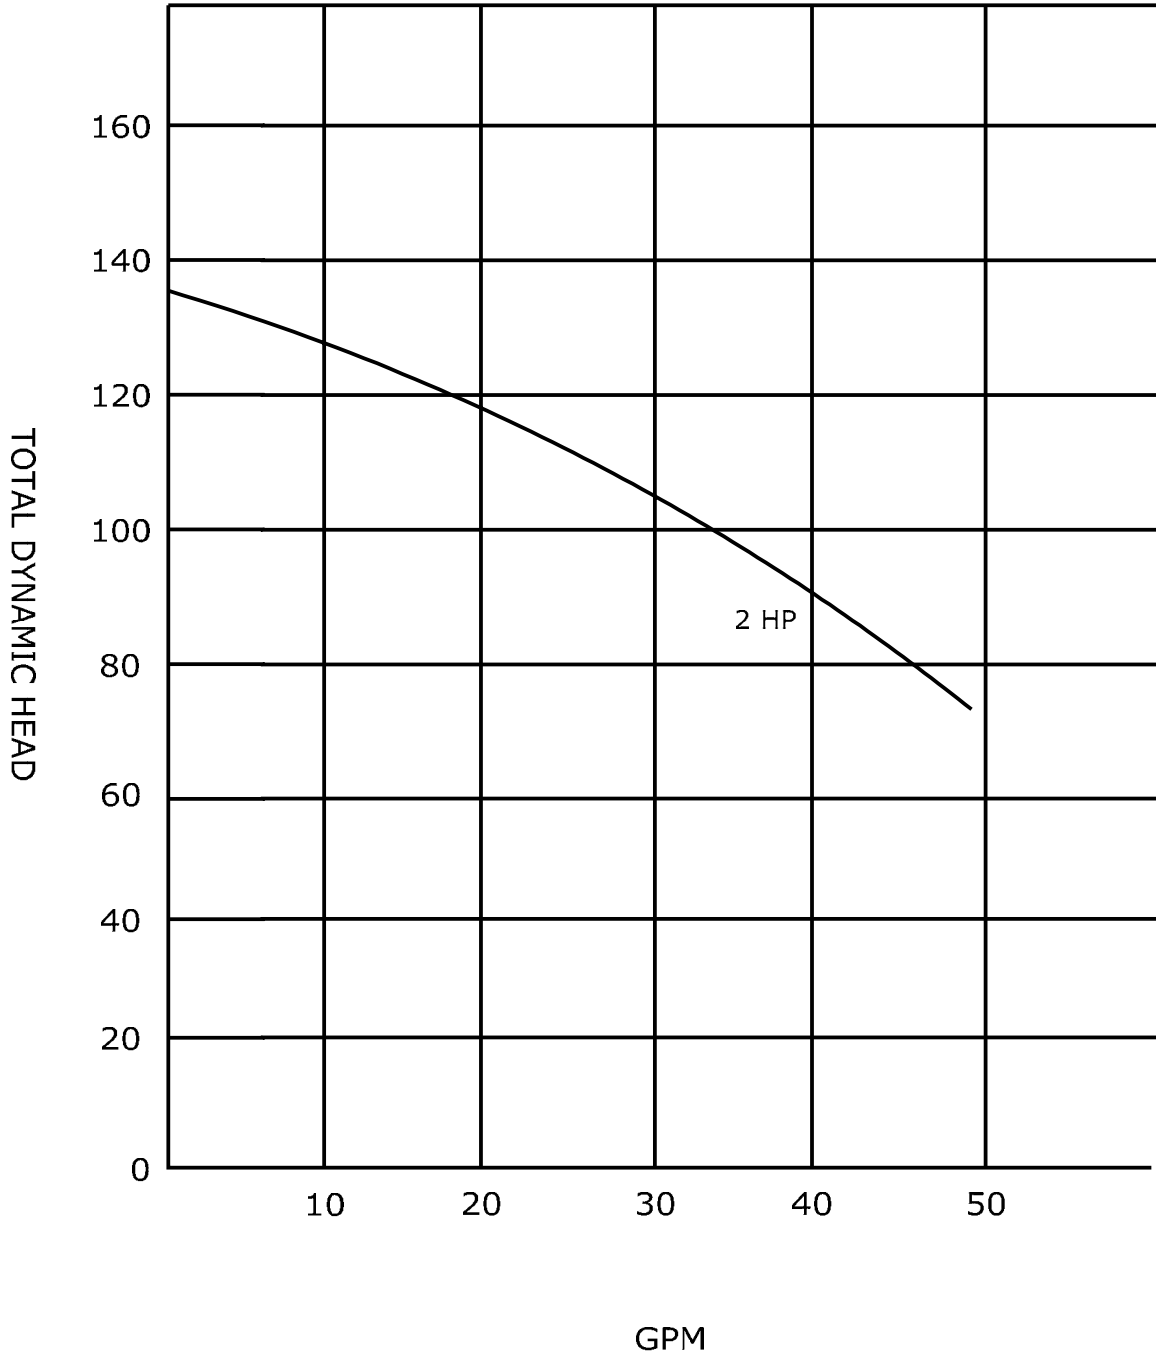

MULTIAQUA

The Gould MCS Series are end suction centrifugal pumps. The liquid solution handling parts are constructed out of AISI 304 and 316L stainless steel for corrosion resistance. The casing is stainless steel construction with NPT threaded connections. The casing also contains easily accessible vent, prime and drain connections with stainless steel plugs. The motor is open drip proof and has a totally enclosed fan cooled enclosure. Rugged ball bearing design for continuous duty under all operating conditions.
