

INK IMPRINTERS

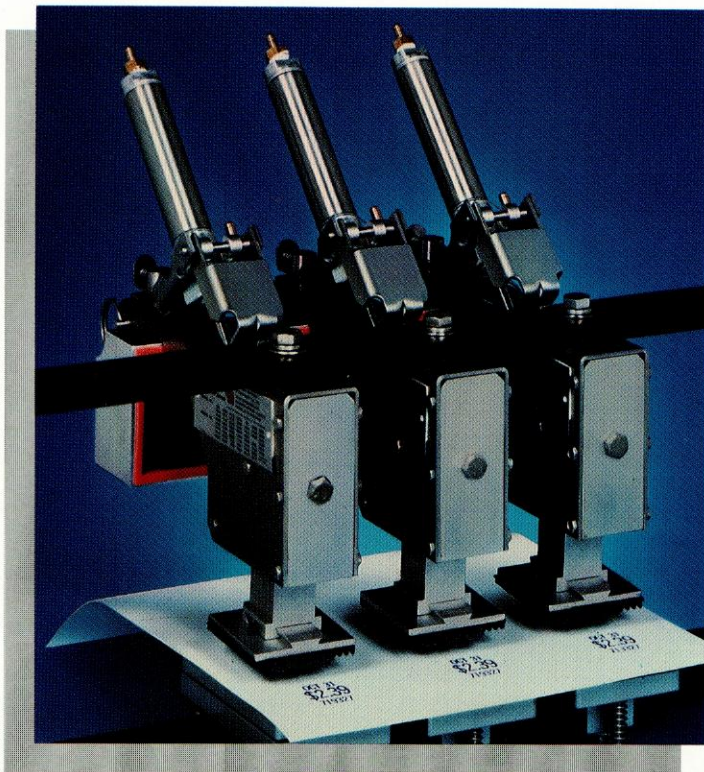

NORWOOD offers the system to meet your specific requirements. The MINI-MARKER applies clear, legible imprints to products and packages. These systems use a quick-drying ink which is transferred to the substrate by a rubber type pad. Pneumatic drive and exclusive cam-link motion ensure a smooth, quiet operation. The ink cartridge is quick-releasing and disposable, providing an easy, economical solution to your imprinting needs.

MINI-MARKER (Single Unit)

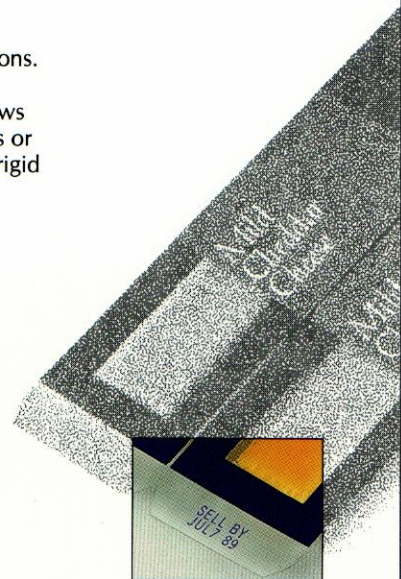

The NORWOOD ink imprinter provides quality, quick-drying imprints on thermoforming, tray and cup forming and filling, labeling, converting and custom packaging, and production lines.

- Imprints include prices, sell-by dates, QA numbers and more.
- Two imprint sizes are available to meet your specific application.
- Typeholder can be rotated 90° for printing in all directions.
- Print head can lock for quick and easy changeover.

MINI-MARKER (multi-unit)

This compact imprinter has all the features of our single ink imprinter and is tailored to multi-lane operations. There is very little gap necessary between adjacent heads which allows imprinting on very narrow packages or products (on flexible, rigid or semi-rigid materials).

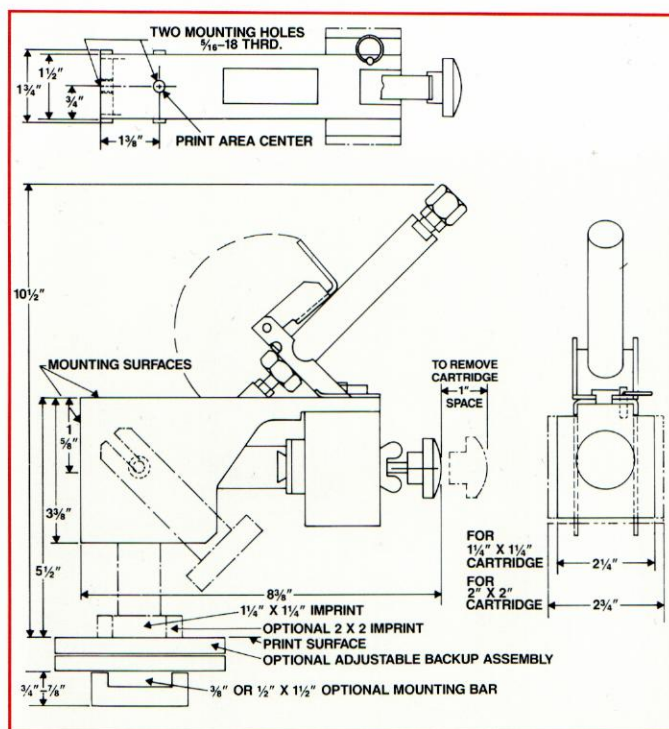

Mini-Marker

Imprint Size—1¼" x 1¼" or 2" x 2"
Speeds—Up to 150 imprints per minute
Dimensions—2¼" W x 10½" H x 8¾" D
Weight—2½ Lbs.
Air—20–40 PSI
Electrical Standard*—110V, 60 Hz, 1A
Metric Equivalent (in millimeters)
Imprint Size—31.75 x 31.75 or 50.8 x 50.8
Dimensions—57.2 x 266.7 x 222.25
