

Model GTL - AN1 Case-Tray Packer (Goodman All-In-One™)

Form, Pack and Seal Cases or Trays Within One Compact Machine!

Pearson's GTL- AN1 Case -Tray Packer (Goodman All-In-One™) is a fully automatic pick and place case or tray forming, packing and sealing system custom built to your project specifications.

The GTL- AN1 forms a case or tray, top loads flexible, rigid or semi-rigid products into the case or tray and seals it with hot melt adhesive at rates up to 150 packages per minute depending on final configuration. This system can be changed over to different case sizes and pack patterns in less than 10 minutes allowing you to have a complete packing line within a single, compact machine.

The GTL- AN1 can be equipped with one or two product conveyors to accept up to two sources of product into the machine. The layer forming conveyors of the GTL- AN1 are customized to

handle your specific product type.

An ideal solution for sustainability concerns, the GTL- AN1 reduces overall corrugate usage with its proven design of forming wraparound style cases including Retail Case, Club Case or Convenience Case. The standard vacuum blower also reduces air consumption for additional cost savings. The GTL- AN1 is available in optional stainless steel construction with washdown for caustic production environments.

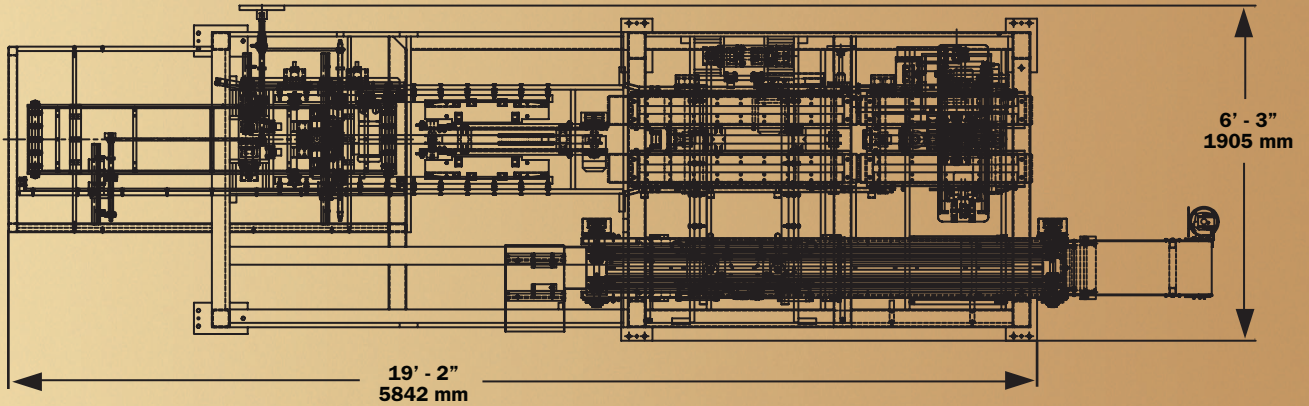

Like all Pearson products, the GTL- AN1 is backed by Pearson's experienced factory professionals as well as one of the largest teams of PMMI certified regional service technicians in the industry, available 24-hours a day, 7-days a week - worldwide.
