PDC SHRINKSEALER MODEL 75-2

applies heat shrinkable seals or labels at the rate of up to 400 per minute. The rate depends on the shape of containers and type of seals or labels. Other models are available for higher and lower rates. Also, special modifications of the basic design are available for unique applications. The machine is fully mechanical and does not employ any pneumatic components and suction cups. Made in USA, under U.S. Patent No. 3,924,387.

Model	Band Feed	Max. Band Dia.	Max. Band Height	Band Registration
