

# CAPABILITIES PROFILE

**INDUSTRY**

Pharmaceutical  
Cosmetic  
Automotive

**APPLICATION**

Front/Back  
Wraparound

**PRODUCTS**

Cylindrical Containers  
Square Containers  
Oval Containers  
Rectangular Containers

**PRODUCTION RATE**

Up to 100 PPM

## A NEW Economically-Priced Automatic Labeling System

**EconoLine** is a simple, economically-priced pressure-sensitive labeling system that may be configured for front/back or wraparound applications for speeds up to 100 ppm. EconoLine was specifically designed to set a new low price standard and fill the gap between slow, semiautomatic labelers and other in-line labeling systems.

EconoLine utilizes a six foot long conveyor with adjustable conveyor height. Label applicators feature lead screw, no tool adjustments. A simple microprocessor controller allows reliable label dispense accuracy and time delay adjustments.

This system is simple, reliable and ideal for hand loading or slow speed in-line applications.
