### Description:

Self-Contained drawer base refrigerator storage units with mechanically cooled pan opening. These units are offered in variety of lengths to meet your specific base storage or pan storage requirements. The mechanically cooled pan opening uses Randell's exclusive design technologies, such as our Exclusive Refrigerated Pan Opening Thermostat allowing customers to make adjustments to the opening temperatures (independent of the base). Automatic hot gas evaporator is provided for eliminating the base coil's condensation. The base is designed with a "low-profile" cabinet and is supplied with a plate shelf above the refrigerated openings.

These units feature our Patented Drawer Cartridge Assembly. A fully welded, unitized drawer cartridge assembly with a quick release that allows the refrigerated drawers to be easily removed for cleaning.

This equipment is intended for use in rooms having an ambient temperature of 86°F (30°C) or less.

### Specifications:

**CABINET EXTERIOR:** Top to be one piece of die-formed 16 gauge stainless steel with 2 1/2" nosing. Backsplash to be coved cornered, with 45° return at top and overall height of 6 3/4". Ends at top fitted with recessed heavy duty steel bars for field bolting units together, producing a hairline seam. Hinged louver panel to be stainless steel. Exterior body to be corrosion resistant steel. Door opening frames are ABS and contain magnetic strip for positive seal of door gaskets. Work surface to be at 36" work height. Legs to be 6" high stainless steel with adjustable bullet foot. Legs mounted to full length channel frame assembly which is integrally welded to bottom of body assembly. Legs can be moved left to right to avoid floor obstacles during installation.

**CABINET INTERIOR:** Base interior to be ABS thermoplastic at ends only. Stainless steel interior liner to be coved cornered to form bottom, back and top. One baked enamel finished shelf provided behind each door. Unit insulation to be CFC free foamed in place urethane.

**REFRIGERATED DRAWERS:** Fully welded, unitized drawer cartridge assembly - patented. Heavy duty full extension 14 gauge drawer tracks on 1 5/8" heavy duty stainless steel bearings. Will accommodate (2) 12" x 20" x 4" deep pans per drawer (pans not included). Quick release allows drawers to be easily removed for cleaning. Stainless fronts, mounted to drawer cartridge assembly with easy to grasp drawer handles. Drawers are self-closing with press fit magnetic gaskets - (designed for installation & removal without tools).

**REFRIGERATION:** System is a balanced heavy duty R-404A refrigerant system with an energy efficient automatic defrost (for base evaporator coil). The base is cooled by an independent blower coiled operating on its own expansion valve and thermostat and operates through a dedicated solenoid valve. A pressure control is provided to operate the condensing unit on demand. The pan opening is provided with its own thermostat (located in the compressor housing) making it easily adjustable for specific ambient conditions without effecting the balance of the system. An on/off switch for the pan opening is located above the louver panel.

model 51375LPP0 shown with:

- optional finished end
- pan covers removed
- standard backsplash removed

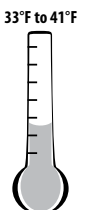

### Standard Features:

- "Low-profile" refrigerated cabinet with plate shelf above
- Low profile 2" recess pan design provides easy reach and optimal pan temperatures & reliability
- Balanced (extra) high capacity refrigeration system with expansion valve metering-able to handle peak period demands
- Full Length Poly Cutting Board
- Front breathing compressor housing with directed air flow-Randell Exclusive
- Patented Drawer Cartridge System with easy maintenance Press-Fit gaskets - **A Randell Exclusive**
- Pan opening thermostat- A Randell Exclusive
- Drain in pan opening for easy cleaning
- Hinged louver for easy access
- Hinged removable stainless steel covers
- Automatic base defrost with condensate evaporator
- Foamed in place urethane insulation providing superior insulation and durability
- 6" high adjustable legs, moveable left to right if needed
- Available up to 16' under one common assembly
- Adapter bars are standard to accommodate a compliment of 1/6 size pans
- Front breathing louver design allows sealing to wall & curb mounting without special requirements

### Options & Accessories:

- Hinged slide-back removable covers
- Lift-Off (removable) night covers
- Stainless Steel Ends
- Stainless Steel Back
- Laminate fronts, ends and back options
- Casters in lieu of legs
- Export voltages
- Wide pan opening
