

BATCH WEIGHING SYSTEM

OUR BATCH WEIGHING SYSTEMS HAVE PROVEN TO BE THE MOST RELIABLE STANDARD IN THE PNEUMATIC CONVEYING INDUSTRY FOR THE CONTROL AND BATCHING OF DRY BULK MATERIALS

THEY ARE DESIGNED WITH NEW AND IMPROVED COMPONENTS TO PROVIDE CONSISTENTLY ACCURATE WEIGHT MEASUREMENTS, EASE OF OPERATION AND MAINTENANCE FREE CONSTRUCTION

THE AUTOMATIC SCALE VALVE IS THE KEY COMPONENT IN THE SYSTEM AS IT DIVERTS THE CONVEYED MATERIAL INTO THE RECEIVING HOPPER AND VENTS THE TRANSFER AIR. LOAD CELLS INTEGRATED WITH A MICROPROCESSOR BASED CONTROLLER PRODUCE A VERSATILE BATCH OR LOSS-IN-WEIGHT SYSTEM

OUTSTANDING FEATURES:

- AUTOMATIC SCALE VALVE AVAILABLE IN ALUMINUM, STEEL OR STAINLESS STEEL CONSTRUCTION
- FABRICATED HOPPERS IN ALUMINUM, CARBON STEEL OR STAINLESS STEEL CONSTRUCTION
- AUTOMATIC DUMP VALVE

OPTIONS:

- FLUIDIZING CONE FOR FLOW ENHANCEMENT
- IMPACTOR / VIBRATOR
- ACCESS MANWAY
