

SIMPLEX

FILLER COMPANY

MODEL BF-15
vacuum filler

The Simplex Model BF-15 is the perfect answer to low-volume, low-cost filling of hard-to-handle liquids normally packaged in rigid containers. It is especially suited for acid filling of electrolytic batteries . . . but has the flexibility as well to accommodate a wide variety of other free-flowing liquids. The Model No.

BF-15 is manually operated, and is portable for added convenience. Special features include automatic shut-off, neutralizer jars, and a large, automatic overflow container. Precision built to give years of maintenance-free service. Units are available, adjustable or non-adjustable, with single, three or six spout handpiece.
