FILLER COMPANY

MODEL FT AIR OPERATED CAP TIGHTENER

Simple yet durable in design, the Simplex FT Air Operated Cap Tightener is a portable, hand-held device that easily integrates into any filling line to tighten caps up to 53 mm in size. The FT incorporates an air motor which has a control that provides easy adjustment of chuck speed for meeting torque requirements. A spring is also provided for hanging the FT over a conveyor, packing table, or any other working area. This self-contained design provides for easy operation and results in years of dependable, maintenance-free service. Air requirements are minimal.

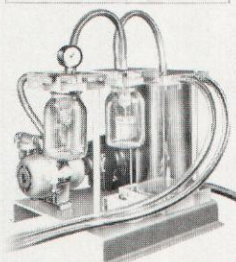

Chucks and inserts are interchangeable and provide quick changeover within seconds to accommodate different size caps. Refer to the following list for available chucks and inserts:

Chuck	Insert	Size (mm)	Range (mm)
P	P	10	10-15
G	G	22	15-22
B	B	24	22-24
C	C	28	24-33
D	D	38	35-40
J	J	48	43-48
N	N	53	51-58
