PLUNGING SPOUT

PLUNGING SPOUT ASSURES ABSOLUTE DRIP-FREE OPERATION REGARDLESS OF VISCOSITY

EXTENDED

RETRACTED

The Simplex Plunging Spout working in conjunction with the cut-off valve provides for the perfect bottom-up fill with drip-free operation regardless of viscosity of material. Complete control of the operation can be adjusted while the machine is in motion for ideal fill characteristics. Plunge depth is adjustable from 0" to 6". Plunging spout design now allows for bottom up fill on existing conveyor system.
