Will-Flow

HAND PUMP

FOR SEMI-SOLIDS AND HEAVY LIQUIDS

MODEL 5

Entire unit clamps tightly to top of standard 5-gallon container. Pumps materials such as adhesives, chemicals, baker's dough, foods, glue, heavy syrup, jams, jellies, paints, printing ink, shortening, and many other semi-solid and heavy liquid substances. All metal parts that contact material are made of 18-8 stainless steel. Positive-acting lever delivers steady, smooth flow. Pump barrel extends all the way to bottom of container — no waste of material. Inspection port provided in cast aluminum cover enables examination of condition or quantity of material in container. Soft plastic handle grip. Extension tube attachments available.

STAPCO

if it will flow, *Will-Flow* will pump it!
