Masterflex® P/S Pump Systems

Thermo Fisher Scientific combines digital control with peristaltic pump technology to provide high-accuracy, maintenance and worry free performance to your chemical feed applications.

- Menu-driven LCD graphical interface provides easy system set-up.
- Loaded with a broad range of remote control options—ideal for automated process applications.
- The brushless motor driven by a PWM control is capable of a flow range turndown of 380,000:1.
- Other control capabilities include programmable dispensing by volume, time, or copy modes with a programmable delay between cycles for convenient, automated dispensing.
- Precise PWM speed control ( $\pm 0.1\%$ ) maximizes accuracy and efficiency while the brushless motor gives you quiet, maintenance-free reliability.
- Optimize system accuracy by calibrating the pump system in process. The calibration is stored in memory—one calibration value per tubing size.
- Program the drive via the simple membrane keypad and multi-language display.
- Reversible motor so you can purge tubing before or after pumping.
- IP33 rated ABS housing for improved splash and dust resistance.
