SPECIFICATIONS

Length: 117.04" (2973 mm)
Width: 31.38" (797 mm)
Height: 44.70" (1135 mm)
Net Weight: 770 lb (349 kg)
Motor: 2 HP (1.5 kW)
Feed Belt Motor: 3/4 HP (.56 kW)

APPLICATIONS

The Urschel §Model OC specializes in crosscut bias slicing of elongated products including: pickles, carrots, celery, rhubarb, okra, potatoes, squash, etc. The machine features a wide selection of slice thicknesses, continuous operation for uninterrupted production, and simplified design for easy cleanup and maintenance. The Model OC will accommodate products up to 2.5" (63.5 mm) in diameter or width.

OPERATING PRINCIPLE

Product is fed onto a conveyor belt which carries the product to the slicing wheel. Knives under tension serve as spokes and support the rim of the slicing wheel. The knives are slightly twisted to create a uniform pitch from the hub to the rim. Knife pitch serves to pull product through the slicing wheel and produce a precise slice thickness. One slice is made at a time which prevents crushing of the product. The cut slices are then discharged from the machine.

TYPES OF CUTS

Bias Flat Slices & Bias Crinkle Slices: Wide range from 1/16 to 1-3/4" (1.6 to 44.5 mm)

Bias Flat Slices When Specially Equipped With a MicroSlice® Wheel: .030 to .120" (.8 to 3 mm). Consult factory. Requires certified print.

If your product application is not mentioned on this page, contact your local Urschel representative to determine the most effective solution to your size reduction needs.

§ The Model OC may contain parts protected by U.S. Patent No. 5992284.
